

Manual

iTap clamp-lock for glass bottles

The clamp-lock is designed for no-foam sped-up pouring of foamy drinks into glass bottles with the bottlenecks for crown corks Ø 1.02 in (26 mm) using the **Itap** and **Itap2** pouring devices.

Only the workers who studied the instruction manual for Itap and Itap2 and passed the safety instruction class may use the device.

Safety measures

- The maximum operating pressure is 0.2 MPa.
- Attention! Be careful! The bottle might break during the pouring!
